SARUULTUYA ORKHONTUUL

Business & Data Analyst | FP&A | Power BI | Commercial Analytics

Melbourne, VIC | +61 424 474 329 | sarkoovich@gmail.com | linkedin.com/in/saruultuya-orkhontuul

KEY ACHIEVEMENTS

- Scored **800/800** on the National Mathematics Entrance Examination - highest score nationally (2013) and awarded Gold and Bronze medals in district Mathematics Olympiads
- Engineered a production forecasting model achieving **92% accuracy** across 3 product categories - directly driving quarterly procurement and inventory decisions worth AUD 1M+
- Eliminated **~15 hours/week** of manual reporting by architecting an end-to-end Power BI solution (DAX, Power Query, star schema) across 4 business functions - adopted as the primary C-suite decision tool
- Uncovered **AUD 80,000+** in annual cost savings through statistical analysis of logistics and operational spend - built the business case and secured leadership buy-in
- Secured **AUD 300,000** in investment funding by building 3-scenario DCF models and 5-year projections from scratch - presented directly to investor groups
- Reduced **5-department** reporting cycle from 3 days to same-day by replacing fragmented Excel workflows with automated Power BI dashboards

PROFESSIONAL SUMMARY

Analytically exceptional business and data analyst with 3+ years of commercial experience converting fragmented, complex data into decisions that move businesses forward. Sole analyst across an entire organisation - simultaneously owning FP&A, BI development, commercial reporting, and operational analytics with no team support. The combination is rare: financial modelling depth of an FP&A professional, the technical capability of a BI developer, and the commercial instinct to know which numbers matter. Advanced Power BI (DAX, Power Query, star schema modelling), Excel (financial models, Power Query, What-If Analysis), strong self-taught SQL, and growing Python capability. Exceptional quantitative foundation - 800/800 national mathematics exam, highest score nationally. Master of Business Analytics (AI Specialisation) at La Trobe University, Melbourne. Built to work with data. Driven to find what others miss.

TECHNICAL SKILLS

Business Intelligence - Advanced

Power BI: DAX (time intelligence: YOY, MTD, QTD, rolling averages, CALCULATE, FILTER, ALL, ALLEXCEPT, DIVIDE) | Power Query - multi-source data connections, cleaning, transformation, automated refresh | Star schema data modelling | Executive dashboards from scratch | Drill-through, cross-filtering, RAG conditional formatting | Row-level security

Excel: PivotTables | Power Query | INDEX/MATCH, SUMIFS, dynamic arrays | 3-statement financial models | What-If Analysis (Goal Seek, Scenario Manager, Data Tables) | Budget vs actual reporting

Tableau: Calculated fields | Data source connections | Interactive dashboards

Data & Programming

SQL: Self-taught to strong competency - JOINs, subqueries, aggregations, window functions (ROW_NUMBER, RANK, LAG, LEAD), CTEs, GROUP BY, multi-table queries

Python: pandas, numpy, matplotlib, seaborn | Regression and classification models (sklearn) | Data cleaning and exploratory analysis

SAS: Data mining - model building, parameter tuning, results interpretation

Other: Azure (foundational) | Machine learning (academic) | Data warehousing concepts | AI tools: Claude, ChatGPT, Microsoft Copilot

Analysis Capabilities

Methods: Statistical forecasting | Time series analysis | Regression and classification modelling | Variance analysis | Root cause analysis | Trend and anomaly detection | Scenario and sensitivity modelling | Data mining | Cohort analysis | KPI development | Cost-benefit analysis | Data storytelling

Finance & Commercial

Finance: FP&A | Budgeting and rolling forecasts | P&L analysis | Management accounting | DCF modelling | Investor reporting | Business case development | Cost optimisation | Commercial analysis | Revenue analysis

PROFESSIONAL EXPERIENCE

FP&A Manager & Analytics Lead

Tok Tok LLC | Mongolia (Largest Food Delivery Company in Mongolia) | *January 2021 - November 2023*

Operated under Tavan Bogd Holdings - Mongolia's largest conglomerate (subsidiaries: Toyota Tavan Bogd, KFC Mongolia), adhering to the highest corporate financial governance standards in the country, shaped by Japanese business management principles.

Power BI & Business Intelligence

- Architected the company's entire Power BI environment from zero - designed **star schema data model** connecting 4+ disconnected source systems, built a DAX measures library (30+ measures), automated Power Query pipelines, and deployed multi-page executive dashboards adopted across the full business.
- Eliminated **~15 hours/week** of manual Excel reporting by replacing fragmented spreadsheet processes with live, automated Power BI dashboards - became the single source of truth for C-suite monthly business reviews.
- Engineered complex DAX measures including time intelligence (YOY, MTD, rolling 12-month averages), dynamic variance calculations, margin analysis, and KPI scorecards with RAG conditional formatting - enabling non-technical executives to self-serve analysis for the first time.
- Built Power Query (M) transformations automating data cleaning, reshaping, and integration from multiple raw source files - ensuring consistent, audit-ready data across all reporting outputs.

Commercial Analysis & Insight

- Uncovered **AUD 80,000+** in annual cost-saving opportunities by statistically analysing logistics and operational spend patterns - identified inefficiencies others had missed, structured findings as a business case, and drove recommendations through to leadership decisions.
- Monitored dashboards and recurring reporting across sales, logistics, and operations - proactively surfaced trends, anomalies, and risks before stakeholders asked, and translated findings into concise executive-ready written summaries.
- Partnered with commercial, marketing, and operations teams to understand reporting needs, prioritise analysis requests, and develop KPI frameworks - creating consistent, measurable performance standards across the business for the first time.
- Proactively identified and resolved data quality and integrity issues across multiple disconnected source systems - documented fixes and established validation procedures to prevent recurrence.

Financial Planning & Modelling

- Owned the full annual budgeting and rolling forecast cycle across **5 departments** - delivered monthly P&L variance analysis with root cause commentary and forward-looking commercial recommendations directly to C-suite leadership, every month without exception.
- Engineered statistical time series forecasting models from scratch - achieving **92% accuracy** in production across 3 product categories, reducing planning risk and directly informing procurement decisions worth AUD 1M+. [Accuracy based on model validation output]
- Secured **AUD 300,000** in investment funding by building investor-grade financial models featuring 3-scenario DCF analysis, sensitivity tables, and 5-year cash flow projections - presented directly to investor groups.

Financial Analyst

Tavan Bogd Foods LLC | Tavan Bogd Holdings | Mongolia (KFC Franchise Operator) | *January 2018 - July 2018*

Subsidiary of Tavan Bogd Holdings alongside Toyota Tavan Bogd - all financial reporting operated under Mongolia's highest corporate financial governance standards.

- Identified a **12% logistics budget overspend** across 3 cost centres through variance analysis - supported management corrective action with data-backed recommendations that were implemented within the quarter.
- Standardised data validation and reconciliation procedures across 4 financial reporting streams - improving data integrity and reducing month-end close errors to meet group-level governance requirements.
- Contributed to group-level budgeting and financial forecasting under Tavan Bogd Holdings governance - gaining direct exposure to multi-entity financial planning and franchise financial performance monitoring.

EDUCATION

Master of Business Analytics (AI Specialisation)

La Trobe University, Melbourne | *February 2024 - November 2025*

- Subjects: Business Intelligence | Data Mining | Data Visualisation | Machine Learning | Statistical Modelling | Database Management | Data Warehousing | Big Data Analytics | AI and Deep Learning

Bachelor of Business Administration

National University of Mongolia | *September 2013 - June 2017*

- Scored **800/800** on the National University Entrance Mathematics Examination - highest score nationally (2013)
- Awarded Gold Medal and Bronze Medal - district-level Mathematics Olympiad competitions

ANALYTICS PROJECTS

Commercial Performance Dashboard

Power BI | DAX | Power Query | Star Schema Modelling

- Built a multi-page Power BI dashboard tracking 15+ KPIs across 4 integrated data sources - star schema model, time intelligence DAX (YOY, rolling averages, budget vs. actual variance), automated Power Query refresh, RAG conditional formatting, and drill-through capability for executive reporting.

Demand Forecasting & Predictive Analytics Model

Python | Statistical Time Series | pandas | sklearn | matplotlib

- Engineered a demand forecasting model on a 500,000-row retail transaction dataset - applied and compared statistical time series methods and regression techniques, applied feature engineering, and visualised seasonal trends and forecast performance. [Academic project]

Data Mining & Classification Modelling

SAS | Python | sklearn | pandas

- Applied data mining techniques using SAS and Python to identify patterns across large business datasets - built, tuned, and interpreted classification and regression models, and translated findings into clear business recommendations.

SQL Analytics Pipeline

SQL | Python | Excel | Power BI

- Built an end-to-end analytical pipeline - extracted and transformed data using SQL (window functions, CTEs, multi-table joins), cleaned in Python (pandas), and built executive-level reporting in Excel and Power BI identifying key commercial and operational performance drivers.

CERTIFICATIONS & DEVELOPMENT

- SAS Analytics - La Trobe University
- Microsoft PL-300 Power BI Data Analyst Associate - In preparation
- Active daily user of AI tools: Claude, ChatGPT, Microsoft Copilot - applied to analytical work, reporting automation, and insight generation
